The RX-A730 offered with black and titanium finish available in some areas.

Anti Resonance Technology Wedge Helps to Ensure that Vibrations Do Not Affect Sound Quality

The Anti Resonance Technology (A.R.T.) Wedge is a fifth foot in the centre of the unit. It dampens vibrations from the power transformer, power transistors and heat sinks, as well as vibrations that might be caused by the sound from the speakers.

MHL Support and 4K Upscaling

MHL (Mobile High-Definition Link) lets you connect MHL-compatible mobile phones to the RX-A730 to playback stored content at up to 1080p video quality and with 7.1-channel sound. During playback, the connected device will be charged from the receiver. 4K upscaling makes it possible to enjoy super high-definition resolution from lower resolution video sources.

Network Functions Give You More Control, Greater Access

AirPlay lets you stream music wirelessly from a Mac, PC, iPod, iPhone or iPad. You can also access streaming services from a PC or NAS. Compatibility with FLAC/WAV 192kHz provides best sound quality. And the AV Controller app offers convenient operation from a smartphone or tablet.
