# ATS-2070

## High Sound Quality

### Virtual 3D Surround Sound by DTS Virtual:X

The ATS-2070 supports DTS Virtual: X technology for reproducing virtual 3D surround sound. This adds a virtual overhead channel, providing exceptionally realistic sound filled with spacious stereo presence that immerses you in the action, enhancing the emotion and excitement of the TV images. Moreover, there's a special "Up-mix" function which creates a virtual height channel — even for sources that are not virtual 3D surround compatible — to enhance the spacious multi-dimensional presence with the sensation of height.

*Available via future firmware update.

### Dynamic, Clear Sound

The ATS-2070 centre unit includes four 46 mm (1-3/4") woofer units and two 25 mm (1") tweeter units. It utilises newly designed circular speaker units and its cabinet capacity is optimised to improve sound quality — delivering dynamic, clear sound for an immersive listening experience that brings your TV/video content to life.

**4** Woofers  **2** Tweeters

Woofers          Tweeter

### Wireless Slim Type Subwoofer for Triling Bass

The ATS-2070 system includes a slim type wireless subwoofer that features a 16 cm (6-1/4") woofer unit on the side of the cabinet, and delivers high-powered output of 100 watts for bass reproduction that is rich, dynamic and expansive. It is compatible with wireless connections and comes in a slim, compact cabinet for exceptionally flexible installation.

### Clear Voice Function

Clear Voice raises the level of dialogue and narrations while maintaining overall sound quality. Movies and TV shows, sports commentary and news broadcasts are more clearly audible.

### Five Surround Modes

The ATS-2070 offers a choice of five surround programmes: Music, TV Program, Movie, Sports and Game. Choose the one to match what you're watching and enjoy the best possible surround sound quality.

## Beautiful Installation and Simple Connection

### Attractive Presence with Softly Rounded Edges

Low-profile design

Touch-type operating buttons

Wall mountable

L-shape design with fabric and plastic combination

### Wireless Music Streaming via *Bluetooth*

Listen to any and all music from your smartphone via the wireless *Bluetooth* connection. You can play music from music apps, radio apps, or YouTube™-type video hosting services, and more. Furthermore, for compressed sound sources, the Music Enhancer function restores frequency response lost during digital compression, so your music sounds the way it should. It is optimised for any compressed content, for vivid, lively sound quality.

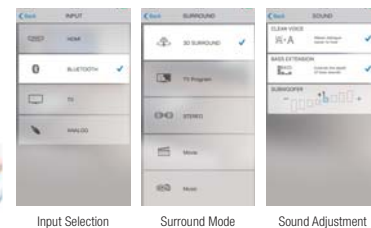

### HDMI Terminal with 4K Ultra HD, ARC Support

The ATS-2070 is equipped with HDMI input/output terminals, and supports 4K/60p video signal pass-through. In addition to supporting HDR (High Dynamic Range), the standard for the 4K Ultra HD Blu-ray format, the units are also compliant with the latest HDCP 2.2 digital copy protection. It also includes an Audio Return Channel function, enabling data to be sent and received via the same HDMI cable, so you can hear the sound from the TV via a single HDMI cable, with no need for an extra optical cable.

## Easy to Use

### Home Theater Controller App

The ATS-2070 is compatible with a free controller app for iOS and Android. The intuitive and easy-to-see operating screen uses icons that let you easily perform a variety of operations. You can also select five surround modes: Movie, Sports, Game, Music, or TV programme.

Input Selection    Surround Mode    Sound Adjustment

### HDMI CEC

Another benefit of HDMI is the availability of CEC functionality. When the unit is connected to a CEC compatible TV, it will turn on and off together with the TV, and you can use the TV remote to control the volume.
