With nine separate channels plus bass, CINEMA DSP 3D gives surround sound a true three-dimensional quality, using the extra channels to create higher and wider sound fields. The RX-A2040 also takes full advantage of two ES9006 Premier Audio DACs from ESS Technology. These DACs provide 8-channel DA conversion with exceptionally good S/N ratio and dynamic range to ensure true professional audio quality.

**Wi-Fi Built-in Provides Superior Functionality with Easy Setup**

Wi-Fi Built-in improves installation flexibility. WPS and other types of Wi-Fi setup are supported. By using Wireless Direct, you can connect the AV Receiver wirelessly and directly to a smartphone, making it possible to enjoy music files on the phone via AirPlay or HTC Connect™, and to operate the receiver via AV CONTROLLER App.

**YPAO with R.S.C., Multipoint Measurement and YPAO Volume**

YPAO analyses the room acoustics and your system, then precisely adjusts various audio parameters to provide optimum sound. YPAO R.S.C. (Reflected Sound Control) enhances the sound to studio-grade quality. YPAO Volume automatically adjusts the high and low frequency levels at any volume level so that you hear natural sounds even at low volume.
