

HD-300

Firmware Update Guide

Thank you for using a Yamaha product.

This document explains how to update the firmware of the HD-300.

NOTICE

- This updater is to be used at the user's own risk.
- DO NOT power off or disconnect the cable from the product during the updating process. The HD-300 may be damaged.
- DO NOT remove the USB flash drive from the product during the updating process. The HD-300 and the USB flash drive may become inoperable.
- If the update fails, and the HD-300 still does not operate correctly even after you execute the update once again, please contact your Yamaha dealer.
- This firmware and documentation are the exclusive copyrights of Yamaha Corporation.
- Reproducing or modifying all or parts of this firmware or its documentation without permission is strictly prohibited.
- The company names and product names in this document are the trademarks or registered trademarks of their respective companies.

- HD-300_instdat.bin

This document (PDF file) Update guide Japanese version (PDF file) The update program

- **Required Items**
 - ZIP format file required for firmware update
 - USB flash drive formatted to FAT32

The files required for firmware update can be downloaded from the website below. Also, please check the URL below for a list of supported USB flash drives. <u>http://download.yamaha.com</u> * After selecting your country and clicking on "Firmware/Software Updates" for the ZIP for file or "Documents and Data" for a list of supported drives from the "Support" page, set the "Brass & Woodwinds" on the product category and enter "HD-300" to perform a search.

Checking the Current Version

Press the "Settings" button on the main unit and select "Firmware Version:" with the cursor button to display the version.

| 4 • • | Setting 5 / 5 | - + |
|--------------|---------------|---------|
| Language: | : | english |
| Firmware | Version: | v2.00 |

"Firm version: v*.**" indicates the current version of the firmware.

Updating Procedure

- Download the compressed (ZIP format) file on your computer, right-click and execute "Extract All".
- 2. When the file is unzipped, the folder will be displayed. Open this folder and look for the firmware update file "HD-300_instdat.bin".

- 3. Move the file "HD-300_instdat.bin" to the top directory of the USB flash memory.
- 4. Make sure to turn the power off (the Standby/On switch is set to the Standby position,) and then connect the USB flash drive to the [USB TO DEVICE] terminal on the rear panel.
- 5. Hold down the [START/STOP] button, and then turn the power on by pressing the Standby/On switch.

| Firmware Update | |
|----------------------|--|
| C Connect USB Drive. | |
| Man, vz.uu | |
| DSP: v1.00 | |

| Firmware Update | | |
|--------------------------------|--|--|
| PReady to Update? YES = [+] | | |
| DSP: $v1.00 \Rightarrow v1.00$ | | |

6. Press the [+] button to start the update process. This process takes a few minutes.

| Firmware Update | | |
|--------------------------------|------|---|
| Updating Main | 23 % | 6 |
| Main: v2.00 ⇒ v2.01 | | |
| DSP: v1.00 \Rightarrow v1.00 | | |

7. When the update process is completed, following message will appear.

| _ Firmware Update | |
|-------------------|--|
| Please Reboot. | |
| Main. VZ.UT | |
| DSP: v1.00 | |

- 8. Turn the power off and remove the USB flash drive.
- 9. Turn the power on and check the version of the firmware. Refer to "Checking the Current Version".

This completes the update process.
