Accessory

Microphone Cable: 5 m (16.4 ft) × 1

A Connecting and Disconnecting the Microphone Cable

- Before making the connection, make sure that the microphone and the component (e.g., amplifier) are switched off.
- Insert the connector into the microphone socket. Align the key on the connector with the groove in the microphone, and then push the connector into the microphone until it clicks.
- Lower the volume of the component (e.g., amplifier) before connecting the microphone.
- To disconnect the cable from the microphone, pull the connector away from the microphone while depressing the latch lock.

B How to Use

- Set the switch to ON when using the microphone, and set it to OFF when not in use.
- When using the microphone, do not cover any part of the grille with your hand to ensure sound quality.

C Hints

- In order to prevent howling:
 - Lower the volume.
 - Place this microphone so that it is not pointed to the speaker and that there is a sufficient distance between the microphone and the speaker.
 - Do not cover the lower part of the grille with your hand.
- Positioning the microphone close to the sound source causes the so-called proximity effect (a boost in the low-frequency response). This phenomenon can be used to create a richer and warmer bass sound.
